Education

University of Western Ontario

Expected Graduation: April 2027

Bachelor of Software Engineering

London, Ontario

- Relevant Courses: Algorithms and Data Structures, Scripting Fundamentals, Object-Oriented Programming, C# and .NET Development
- Certifications: IBM Data Engineering Foundations, IBM Mainframe Advanced Badge

Experience

Bank of Montreal

May 2025 – August 2025

Incoming Software Developer Intern

Toronto, Ontario

MomentumMind

May 2024 – August 2024

Web developer Intern

Mississauga, Ontario

- Developed on a full-stack web app using **React**, **Tailwind CSS**, and **Node.js**, integrating **CI/CD** pipelines with **GitHub Actions** to automate testing and deployment while utilizing **Agile practices** for iterative development and continuous feedback.
- Implemented **SQL** scripts to manage inventory and database updates, optimizing product tracking and utilizing **CI/CD** processes for continuous testing and deployment.
- Analyzed website performance using **Google PageSpeed Insights** and implemented **lazy loading**, resulting in a **22%** improvement in loading times.

Morrisiette Entrepreneurship Insitiute

Oct. 2024 – Current

Entrepreneurship Ambassador

London, Ontario

- Demonstrated strong **organizational**, **communication**, and **adaptability** skills by planning events, managing logistics, ensuring smooth execution, and tracking participant engagement to optimize future events.

Leadership / Extracurricular

WeMars

Sep. 2023 – Current

Software Engineer

London, ON

- Collaborated on the control systems for robotic arms and motors using **C++** and **Robot Operating System (ROS)** to ensure precise and responsive movement for the Mars rover.

Western Cyber Society

Sep. 2024 – Current

Project Manager & Lead Mainframe Developer (IBM Mainframe)

London, ON

- Leading a team of 5 to develop **BankFrame**, a replica of a top-five Canadian bank, utilizing **IBM Mainframe**, **IBM DB2**, **Java**, and RESTful APIs to implement secure user accounts, deposits, withdrawals, and transfers, ensuring efficient transaction processing.
- Developed a **NoHup Python** script to automate **IBM DB2** backups, ensuring zero downtime and eliminating the need for manual job requests
- Shifting the **Java** scripts into **COBOL** and **JCL**, while maintaining full functionality and optimizing mainframe performance.

Projects

Amazon Price Tracker Web Scraper

- Created a full-stack web application using **Python** and **Next.js** to allow users to search for products on Amazon, scrape relevant data, store it in a **SQL** database, and visualize price trends through an interactive **D3.js** chart.
- Developed efficient web scraping workflows with **BeautifulSoup** to extract and store product details and utilized **FastAPI** to send data to the database.
- Implemented RESTful APIs with **FastAPI** to handle data scraping, storage in the database, and retrieving scraped data for the frontend.

Pantry Tracker App

- Built a **Next.js** based app with Google login via **NextAuth.js** for tailored, user-specific inventory tracking.
- Utilized **Google Cloud Vision API** and **Firebase** to develop item recognition and automatic inventory entry through webcam scan.
- Developed a recipe-suggestion chatbot with **OpenAI API**, integrating user inventory data and a responsive UI built with **Material-UI**

Technical Skills

Languages: JavaScript, Python, Java, C/C++, SQL, PHP

Developer Tools: Git, VSCode, PyCharm, XAMPP, IntelliJ, Zowe CLI

Technologies/Frameworks: React, Next.js, Node.js, ROS, SQL, Pandas, BeautifulSoup, FastAPI
