

SRINI VANKADARI

☎ 647-657-8466 ✉ svankada@uwo.ca  [linkedin.com/in/svankadari](https://www.linkedin.com/in/svankadari)

Education

University of Western Ontario

Expected Graduation: April 2027

Bachelor of Software Engineering

London, Ontario

- Relevant Courses: Algorithms and Data Structures, Scripting Fundamentals, Object-Oriented Programming, C# and .NET Development
- Certifications/Programs: IBM Z Ambassador, AWS Certified Cloud Practitioner, IBM Z Advanced Concepts Badge

Experience

Bank of Montreal (BMO)

May 2025 – August 2025

Software Developer Intern (Mainframe)

Toronto, Ontario

- Developed an internal automation tool using **PyPDF** and **Pandas** to extract and populate PDF forms with branch data, streamlining document workflows and **improving operational efficiency**.
- Built a data transformation pipeline using **IBM Assembler** and **Python** to convert encoded branch messages into structured tables, **processing 1,000+ records** and exporting them into Excel for non-technical teams, cutting analysis time by **40%**.
- Conducted end-to-end **quality assurance testing** on applications, including **unit testing**, **data validation**, and **edge case analysis**, ensuring reliability, accuracy, and alignment with user requirements throughout the **Software Development Life Cycle**.
- Collaborated with cross-functional teams to develop and pitch an **AI-driven** incident response strategy to C-suite executives, demonstrating **leadership**, **adaptability**, and **strong interpersonal communication**.

MomentumMind

May 2024 – August 2024

Full Stack Developer Intern

Mississauga, Ontario

- Developed on a full-stack web app using **React**, **Tailwind CSS**, and **Node.js**, integrating **CI/CD** pipelines with **GitHub Actions** to automate testing and deployment while utilizing **Agile practices** for iterative development and continuous feedback.
- Integrated a secure payment platform with **Stripe's API**, ensuring PCI-DSS compliance, user-friendly design, and error handling, while monitoring **KPIs** such as transaction success.
- Implemented **SQL** scripts to manage inventory and database updates, optimizing product tracking and utilizing **CI/CD** processes for continuous testing and deployment.

Leadership / Extracurricular

Western Cyber Society

Sep. 2024 – Current

Project Manager & Lead Software Developer (IBM Mainframe)

London, ON

- Leading a team of 5 to develop **BankFrame**, a replica of a top-five Canadian bank, utilizing **IBM Mainframe**, **IBM DB2**, **Java**, and RESTful APIs to implement secure user accounts, deposits, withdrawals, and transfers, ensuring efficient transaction processing.
- Developed a **NoHup Python** script to automate **IBM DB2** backups, ensuring zero downtime and eliminating the need for manual job requests

Projects

Amazon Price Tracker Web Scraper

- Created a full-stack web application using **Python** and **Next.js** to allow users to search for products on Amazon, scrape relevant data, store it in a **SQL** database, and visualize price trends through an interactive **D3.js** chart
- Developed efficient web scraping workflows with **BeautifulSoup** to extract and store product details and utilized **FastAPI** to send data to the **SQL** database.
- Implemented **RESTful APIs** with **FastAPI** to handle data scraping, storage in the database, and retrieving scraped data for the frontend.

Campus Safety App

- Created a full-stack campus safety application using **Go** and **Swift**, implementing a real-time **location-sharing system** that enables students to request escorts and automatically notifies walkers with the requester's GPS coordinates on an **interactive map**.
- Engineered a scalable backend leveraging **AWS Lambda**, **EC2 auto-scaling**, and **SNS** to process **thousands** of concurrent safety requests and deliver **real-time push notifications** for incidents and **geo-fence triggers**, enhancing response time and reliability.

Skills

Languages: JavaScript, Python, Assembly, Java, C/C++, SQL, PHP

Developer Tools: Git, VSCode, PyCharm, XAMPP, IntelliJ, AWS, GCP

Technologies/Frameworks: React, Next.js, Node.js, ROS, SQL, Pandas, BeautifulSoup, FastAPI
